

Video Note Catcher

The Context:

This video is of a kindergarten class from BPS engaged in “planning and carrying out investigations.” The lesson the class is engaged in comes from the FOSS Wood and Paper Unit, and specifically from *Investigation 1, Part 1: Sink the Pine and Plywood*.

Your Task:

As you watch the video, jot down notes of how you see and hear students engaged in this science practice. Take a look at the NGSS Appendix F handout for a reminder of the definition of this science practice, and what it looks like for students to engage in it in grades K-2.

What do I see?	What do I hear?	What questions do I still have?
